

(B) A statement indicating whether the customer had a reportable net long position as defined in § 356.13. If a position had to be reported, the statement must provide the amount of the position and the name of the submitter that the customer requested to report the position.

(2) *Submitter or intermediary requirements.* A submitter or intermediary submitting or forwarding bids for a customer must notify the customer of the customer confirmation reporting requirement if we award the customer \$2 billion or more as a result of those bids.

[69 FR 45202, July 28, 2004, as amended at 71 FR 76151, Dec. 20, 2006; 74 FR 26086, June 1, 2009; 74 FR 47100, Sept. 15, 2009]

§ 356.25 How does the settlement process work?

Securities bought in the auction must be paid for by the issue date. The payment amount for awarded securities will be the settlement amount as defined in § 356.2. (See formulas in appendix B.) There are several ways to pay for securities:

(a) *Payment by debit entry to a deposit account.* If you are paying by debit entry to a deposit account as provided for in § 356.17 (b) and (c), we will charge the settlement amount to the specified account on the issue date.

(b) *Payment by authorized charge to a funds account.* Where the submitter's method of payment is an authorized charge to the funds account of a depository institution as provided for in § 356.17 (d), we will charge the settlement amount to the specified funds account on the issue date.

(c) *Payment through a certificate of indebtedness.* If you are paying with the redemption proceeds of your certificate of indebtedness as provided for in § 356.17(b), we will redeem the certificate of indebtedness for the settlement amount of the security and apply the proceeds on the issue date.

(d) *Payment with bids.* If you paid the par amount with your bids as provided for in § 356.17 (c)(2), you may have to pay an additional amount, or we may have to pay an amount to you, as follows:

(1) *When we owe an amount to you.* If the amount you paid is more than the

settlement amount, we will refund the balance to you after the auction. This will generally occur if you submit payment with your bids. A typical example would be an auction where the price is a discount from par and there is no accrued interest.

(2) *When you must remit an additional amount.* If the settlement amount is more than the amount you paid, we will notify you of the additional amount due. You may owe us such an additional amount if the auction calculations result in a premium or if accrued interest or an inflation adjustment is due. If your securities are to be held in TreasuryDirect®, we will collect this amount through the same payment method that you previously authorized for the transaction. If your securities are to be held in Legacy Treasury Direct®, you will be responsible for remitting this additional amount immediately.

[69 FR 45202, July 28, 2004, as amended at 70 FR 57440, Sept. 30, 2005; 73 FR 14938, Mar. 20, 2008]

Subpart D—Miscellaneous Provisions

§ 356.30 When does the Treasury pay principal and interest on securities?

(a) *General.* We will pay principal on bills, notes, and bonds on the maturity date as specified in the auction announcement. Interest on bills consists of the difference between the discounted amount paid by the investor at original issue and the par value we pay to the investor at maturity. Interest on notes and bonds accrues from the dated date. Interest is payable on a semiannual basis on the interest payment dates specified in the auction announcement through the maturity date. If any principal or interest payment date is a Saturday, Sunday, or other day on which the Federal Reserve System is not open for business, we will make the payment (without additional interest) on the next business day. If a bond is callable, we will pay the principal prior to maturity if we call it under its terms, which include providing appropriate public notice.

(b) *Treasury inflation-protected securities.* (1) This table explains the amount

§ 356.31

that we will pay to holders of inflation-protected securities at maturity.

At maturity, if . . .	then . . .
(i) the inflation-adjusted principal is equal to or more than the par amount of the security..	we will pay the inflation-adjusted principal.
(ii) the inflation-adjusted principal is less than the par amount of the security, and the security has not been stripped..	we will pay an additional amount so that the additional amount plus the inflation-adjusted principal equals the par amount.
(iii) the inflation-adjusted principal is less than the par amount of the security, and the security has been stripped..	to holders of principal components only we will pay an additional amount so that the additional amount plus the inflation-adjusted principal equals the par amount.

(2) Regardless of whether or not we pay an additional amount, we will base the final interest payment on the inflation-adjusted principal at maturity.

(c) *Discharge of payment obligations—*

(1) *The commercial book-entry system.* We discharge our payment obligations when we credit payment to the account maintained at a Federal Reserve Bank for a depository institution or other authorized entity, or when we make payment according to the instructions of the person or entity maintaining the account. Further, we do not have any obligations to any person or entity that does not have an account with a Federal Reserve Bank. We also will not recognize the claims of any person or entity:

(i) That does not have an account at a Federal Reserve Bank, or

(ii) With respect to any accounts not maintained at a Federal Reserve Bank.

(2) *TreasuryDirect®.* We discharge our payment obligations when we make payment to a depository institution for credit to the account specified by the owner of the security, when we make payment for a certificate of indebtedness to be issued and held in the owner's account, or when we make payment according to the instructions of the security's owner or the owner's legal representative.

(3) *Legacy Treasury Direct®.* We discharge our payment obligations when we make payment to a depository institution for credit to the account specified by the owner of the security, or when we make payment according to the instructions of the security's

31 CFR Ch. II (7–1–13 Edition)

owner or the owner's legal representative.

[69 FR 45202, July 28, 2004, as amended at 70 FR 57441, Sept. 30, 2005]

§ 356.31 How does the STRIPS program work?

(a) *General.* Notes or bonds may be “stripped”—divided into separate principal and interest components. These components must be maintained in the commercial book-entry system. Stripping is done at the option of the holder, and may occur at any time from issuance until maturity. We provide the CUSIP numbers and payment dates for the principal and interest components in auction announcements and on our Web site at <http://www.treasurydirect.gov>.

(b) *Treasury fixed-principal securities (notes and bonds other than Treasury inflation-protected securities)—(1) Minimum par amounts required for STRIPS.* The minimum par amount of a fixed-principal security that may be stripped is \$100. Any par amount to be stripped above \$100 must be in a multiple of \$100.

(2) *Principal components.* Principal components stripped from fixed-principal securities are maintained in accounts, and transferred, at their par amount. They have a CUSIP number that is different from the CUSIP number of the fully constituted (unstripped) security.

(3) *Interest components.* Interest components stripped from fixed-principal securities have the following features:

(i) They are maintained in accounts, and transferred, at their original payment value, which is derived by multiplying the semiannual interest rate and the par amount;

(ii) Their interest payment date becomes the maturity date for the component;

(iii) All interest components with the same maturity date have the same CUSIP number, regardless of the underlying security from which the interest payments were stripped, and therefore are fungible (interchangeable).

(iv) the CUSIP numbers of interest components are different from the CUSIP numbers of principal components and fully constituted securities,
